Unstoppable Stories: Nussbaum Transportation

Helping award-winning Nussbaum Transportation take engine performance to the next level.

Nussbaum Transportation, an award-winning trucking company, operates more than 450 Freightliner trucks that offer dedicated carriage and truckload services throughout the Midwest and continental United States. As a purpose-driven company that seeks to drive positive impact for its employees, communities, and partners, Nussbaum Transportation has made significant investments in improving the business.

That's why, despite already conducting oil changes every 50,000 miles, Nussbaum Transportation was interested in further extending performance to improve fleet efficiency and uptime.

It's the unstoppable spirit.

50% oil drain
interval extension

75,000
mile ODI

Improved
fuel efficiency

To achieve its goals, the company approached its distributor, Morgan Distributing, which connected Nussbaum Transportation with the Mobil Engineering team to evaluate the fleet's oil program. After conducting a thorough evaluation, the decision was made to use **Mobil Delvac™ Extreme 10W-30** engine oil, which is capable of doubling OEM-recommended oil drain intervals. Additionally, the team helped implement Mobil ServSM Lubricant Analysis to support the transition and monitor component and oil health.

After switching to Mobil Delvac Extreme 10W-30 engine oil, Nussbaum Transportation was able to safely **extend oil drain intervals to 75,00 miles.**

After implementing the new strategy built around **Mobil Delvac™ Extreme FE 10W-30** engine oil, Nussbaum Transportation was able to safely extend oil drain intervals to 75,000 miles.

Encouraged by the positive results, Nussbaum Transportation approached the Mobil Engineering team a few months later to then identify a solution to improve fuel efficiency. The decision was made to use **Mobil Delvac Extreme FE 10W-30** engine oil, which is formulated specifically to enhance fuel efficiency. Within three months, Nussbaum Transportation converted its entire fleet to the new engine oil, allowing the fleet to deliver even more impact and make progress against its purpose-driven and sustainability goals.
